

International Meeting on

# TRADITIONAL & ALTERNATIVE MEDICINE

July 23-24, 2018 | Osaka, Japan

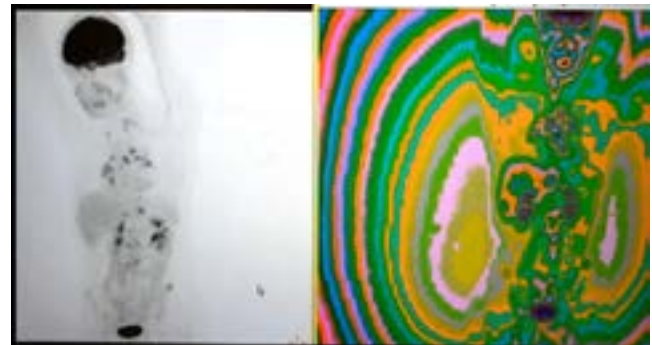

## Inside the MRI and PET scan

Eliya Kostova

Alternative & Complementary & Internal Medicine Clinic, Bulgaria

The purpose of the study is to investigate MRI and PET scan images of cancer patients with nonlinear Biofield Viewer imaging system in order to overcome the fundamental limits of spatial resolution in Positron emission tomography and Magnetic resonance imaging. Magnetic resonance imaging (MRI) is a medical imaging process that uses a magnetic field and radio frequency signals to produce images of anatomical structures, of the presence of disease, and of various biological functions within the human body. Positron emission tomography (PET) is a nuclear medicine imaging that uses small amounts of radioactive material in order to observe metabolic processes in the body serving as an aid to the diagnosis of disease. The Biofield Viewer (BV) is a real-time imaging system that is able to detect and visualize the most subtle layers of electromagnetic activity around living systems. Biofield Viewer developments include real time 3D resolving with thousands of levels of detail compared to conventional images, limited to 256,2D Pro filter,

which three functions to reduce undesired interference frequencies, increase image stability and accuracy. Using a combination of imaging method such as MRI and BV, as well as PET Sc and BV led to more detailed illustration of the anatomical and field structures of the human body, which allow for easier diagnosis and differential diagnosis of structures affected by the carcinoma process.

## Biography

Eliya Kostova is the owner of Neitropia - Alternative & Complementary & Internal Medicine Clinic. He is a Medical doctor with specialization in Internal Medicine, Economy of Health, Law Regulation of Public Health, Management of Recreation, Spa and Wellness. He received Master Homeopath accredited by The Association of Homeopathic Physicians in Bulgaria (AHPB) and European Committee for Homeopathy (ECH). Also a Representative for H.U.M.A Method and Online Materia Medica Master Program of Universidad Candegabe de Homeopatía Argentina.
