NEURODEGENERATIVE DISEASES**
December 03-04, 2018 Madrid, Spain

Alzheimer is cruel guest

Sophia Mohammed Elnour

Sudanese Organization for Alzheimer's Patients and Development, Sudan

What is Alzheimer: Which kind of disease is it strange souls living in the body of people, The end result for our father? Where to take him and where and what is he experiencing. Solving this problem to find the right place and right diagnoses we move to many places many clinics after five years we receipt our cruel and ugly gust it is Alzheimer disease took our soul first and our dad from us. We struggle to face this compulsory gust Alzheimer disease, we sent post in our facebook account to know same people suffering same shock we made group of care givers but we think to be strong and help full group we established association to work as group to raise awareness and support each other's, we build Sudanese organization for Alzheimer's and development nongovernmental organization May 2015 first registration legally. Our goals include, Our goals include, raise awareness about this disease in our country Sudan through media and newspapers, to improve the living condition to the people who are suffering from this disease and their care givers, to made connection between the people with a right health care centers, to establish club for the caregivers to share the experience, to build the first home nursing hospital to Alzheimer's in Sudan.
