

Market Analysis

MARKET ANALYSIS ON INTERNATIONAL CONFERENCE ON DENTISTRY

Ms. Carol Wells

Certified Biological Dental Hygienist, International Academy of Biological Dentistry & Medicine, Canada, E-mail: cwells137@gmail.com

In the overall U.S. dental material market is displayed to experience the highest growth over the predicted period, due to producing of emergence intraoral scanner. In United States the dental materials market is expected to exceed \$1.8 billion by the year 2023. Nowadays dental industry is getting more digitalized. Some dominating countries like North America dominates the global market in dental services market due to high prevalence rate of tooth decay, followed by Europe. Technologies like smile makeover, cosmetic dentistry, laser technology, dental implants, and oral surgery can be beneficial. Due to increased public awareness dentistry is decreased, thereby restorative procedures are necessary. Moreover, the insurance coverage limit for dental needs has not been increased for several years, regardless the rising prices of restorations, dental prosthetics and doctor visits. These factors make it increasingly less affordable for patients to see a dentist, consequently limiting the overall dental materials market.
